## **New Hope for Back Pain Sufferers!**

***A treatment with an incredible 86% success rate with no documented sided effects!***

***By: Dr. Andrew J. Strauss***

Non-surgical spinal decompression may be the last back pain treatment you will ever need. No popping pills, struggling through exercise programs or risky surgery... because with this amazing new technology – for most people – they are a thing of the past. You're about to discover the most powerful state-of-the-art technology available for: Back pain, sciatica, herniated and/or bulging discs (single or multiple), degenerative disc disease, a relapse or failure following surgery or facet syndromes. Best of all -- you can *check it out yourself for FREE!*

Imagine how it would feel to no longer have back or neck pain. In this article you'll learn about the powerful new space age technology and the amazing story of how it was discovered and why it has an 86% chance to alleviate YOUR back pain.

**Over 10 years ago NASA began to notice an unexpected result of space travel – Astronauts that left with back pain would come back without it.** What they found was that during the anti-gravity state decompressive forces on the spinal discs relieved back pain. How?

When gravity is removed all the pressure is taken off the spine and discs and it seems as though a *negative* pressure is created.

It is believed, that this negative pressure actually sucks the herniated material back into the disc and allows it to heal resulting in the reduction and possible elimination of pain.

### **Medical Breakthrough**

This space age technology is now available to the general public via licensed and trained physicians. It is called Spinal decompression and has been clinically proven with an 86% success rate with the pain and symptoms associated with herniated and/or bulging discs... *even after failed surgery.*

**A very important note: spinal decompression** has been successful with even the most severe cases... even when NOTHING else has worked. *Even after failed surgery.*

### **What Are Treatments Like?**

You will be fitted with specialized decompression harnesses then placed on a table in a relaxed position.

The advanced computer system is programmed with the proper amount of distraction and placed at the proper angle allowing us to target specific discs... that are causing your pain and symptoms.

The distraction force is gently increased to avoid muscle guarding and spasm. In addition, a specialized split table design decreases friction and allows separation of the spinal bones, *minimizing the effect of gravity.*

DR. ANDREW J. STRAUSS, BS, DC, MS

Basically, you lay comfortably while an amazing **decompression** computer simulates an anti-gravity effect on your back or neck that helps herniated material return to it's normal position and stop the pain.

Patients describe the treatment as a gentle, painless, intermittent pulling of the back. Many patients actually fall asleep during treatment!

### **How Long Are Treatments And How Many Do You Need?**

Patients typically undergo 15 to 20 treatment sessions. Each treatment lasts between 20 – 40 minutes. This, of course, depends on your individual case and is determined by a thorough evaluation. .

Following each session, a cold pack, cold laser acu-therapy and/or electric muscle stim may be applied to help pain relief and speed the healing process.

It is important to note that many patients get substantial, immediate relief after just a few treatments

**The really good news is...** this is not something you have to continue to do for the rest of your life! So it is not a big commitment.

### **OUR SPECIAL OFFER...**

**Just call my office at 624-0010 and mention that you want a “FREE back or neck pain/decompression qualification evaluation.”** Normally \$145 but it is now absolutely free for a limited time with no strings attached. There is nothing to pay for and you will NOT be pressured to become a patient.

#### **Here's what you will receive:**

- An extensive personal consultation to discuss your concerns and get information about back pain and spinal decompression.
- A Biostructural Back Pain Evaluation and Report.
- We will let you know your options and if Spinal **decompression** is appropriate for you.
- **Demonstrate the decompression unit so you can see for yourself how it works!**

### **Testimonials**

*“After two years of intense back which shot into my legs I was told that surgery was my only hope. After 4 treatments with Dr Strauss my pain is almost completely gone. I am so glad I did not go for the surgery with the possible permanent side effects.”* Dan S. New City, NY

“Years of gnawing pain and stiffness are gone. I thought I would have to take this to the grave.  
Thank you Dr. Strauss!”  
Jim R. West Nyack, NY

The demand for this space-age technology has been incredible. I suggest you call our office at once because a delay could lead to you being placed on a waiting list while others are receiving their care.

**Call Today! 624-0010**

We look forward to helping you soon!
